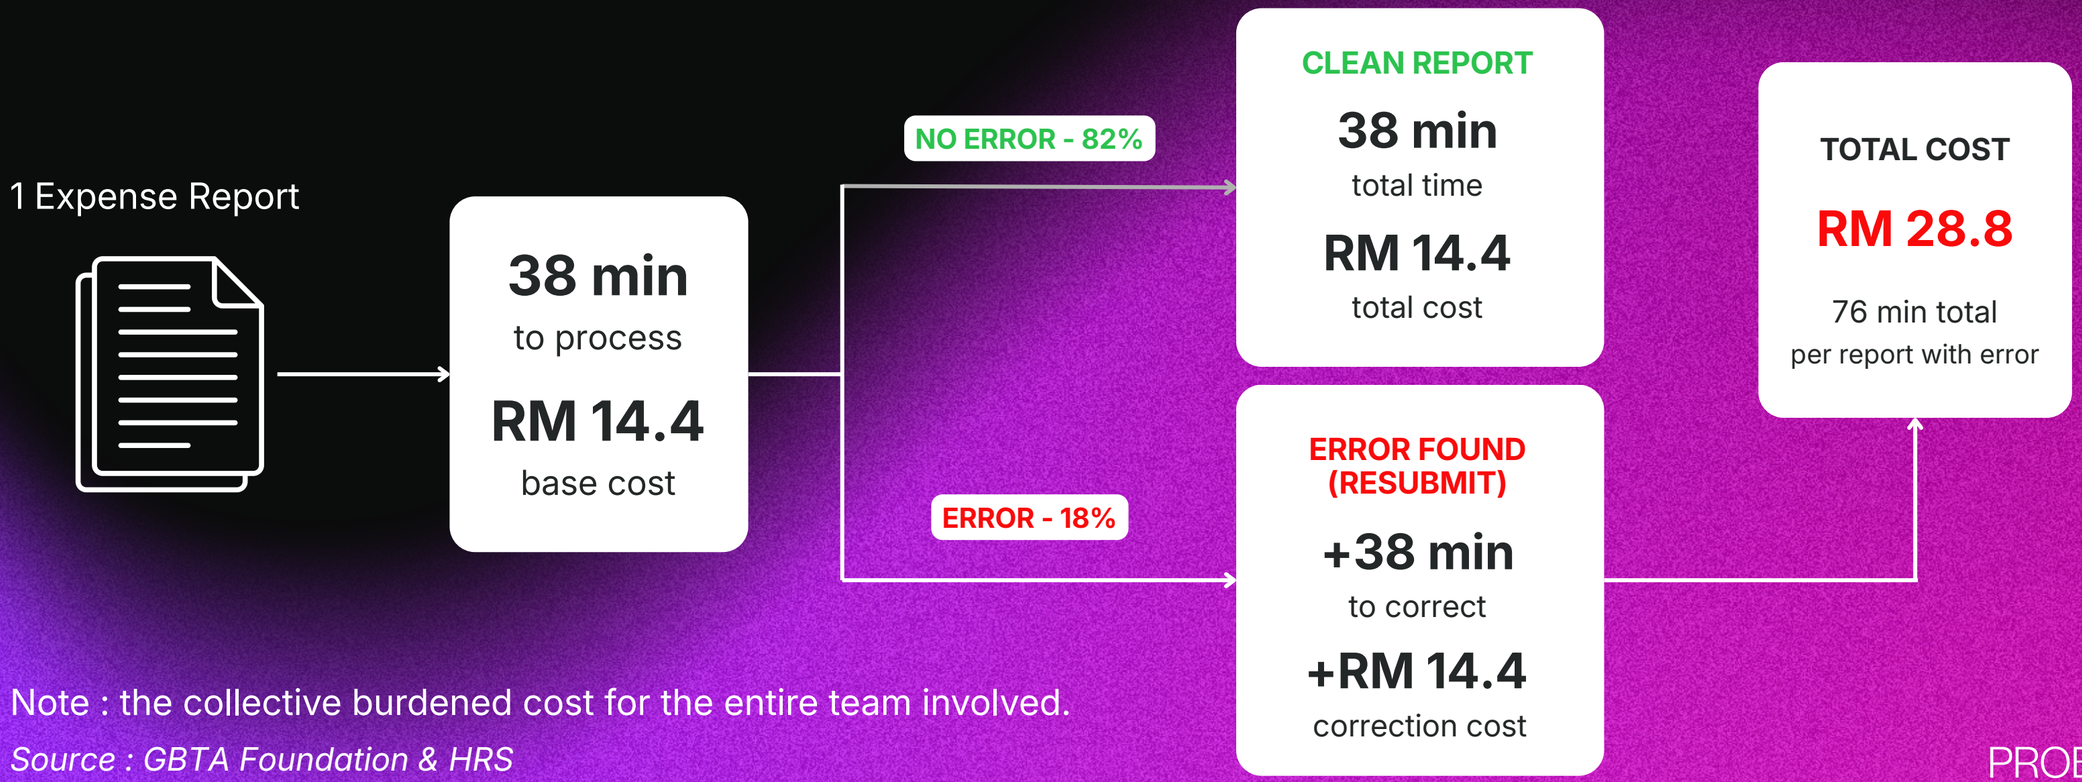
The Cost of Inefficiency

The financial reality of manual review.



Note : the collective burdened cost for the entire team involved.

Reclaim: The Intelligent Compliance Pipeline

Autonomous Agentic AI-powered, end-to-end expense automation.

- Multi-Receipt OCR: Extracts structured data instantly via vision LLMs.
- AI Compliance Evaluation: Evaluates claims against active company policy.
- Autonomous Settlement: Triggers banking APIs for direct employee transfer.

Three LangGraph Pipelines

Policy Agent

5-node LangGraph pipeline

- Process PDFs
- Extract Categories, Budget & Summary
- Extract Checking Conditions
- Create Policy Memory
- Embed & Save Policy Sections

Document Agent

Parallel OCR workers (≥ 4 concurrent)

- Image → Qwen 3.5 vision
- PDF → PyMuPDF4LLM → Gemini
- Parallel Analysis per Receipt
- Anomaly Flag Generation
- Auto Fill Document

Compliance Agent

5-node ReAct pipeline

- Load Memory
- Parallel Analysis with Tools and ReAct
- Aggregate Totals (Pure Python)
- Autonomous Approved / Rejected Payout
- Marked Ambiguous

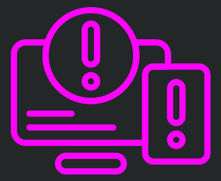
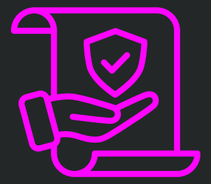
Why Reclaim Wins

The competitive moat.



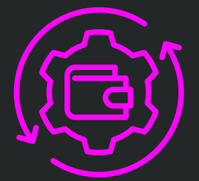
Fraud Trap

Silently flags edited receipt extractions with risk audit signals.



Policy Studio

Upload a single PDF; AI automatically enforces it on every claim.



Autonomous Disbursement

Zero human bottleneck for clean claims.
